Basic Economic Data for Idaho

1988 & 1989

An Idaho Department of Employment
Research & Analysis Publication

FOREWARD

This publication is a supplement to the March 1978, December 1981, August 1986 and August 1988 issues of the Basic Economic Data for Idaho, which contain all previous data. The series has been compiled in response to the many requests for industrial employment data. It contains a historical record of Idaho's Nonagricultural Wage and Salary Employment by industry, tabulated on statewide, county, and area levels.

We hope the publication of this information will assist private and government researchers in their tasks. A large portion of the data was gathered as a result of the day-to-day activities of the Idaho Department of Employment.

The assistance provided by Idaho's business community, local Job Service offices, and the Area Labor Market analysts is greatly appreciated.
